SUMMARY

My career began as a sales engineer and drafter in manufacturing, generating proposals, and maintaining engineering standards. Then, the company I worked for asked me to create a website for them. I had my own small business designing and implementing websites since college; what started as a hobby eventually became my career. I think my engineering background is perhaps my most important strength in that, at its core, all engineering is a recursive loop of strategic planning and data analytics with the ultimate goal of solving a complex problem by breaking it down into manageable pieces while continuously improving processes.

I have a coder's spirit, but because of my extensive non-coding skills and abilities, I ended up in several stakeholder or client-facing roles. Since my time as a writing tutor in high school, I have always gravitated towards writing and mentoring tasks. I have an exceptional technical writing ability which helps my written communications be clear and concise while managing a project or team.

My experience as an AutoCAD drafter and graphic designer have made me deft at generating visual aids, like flowcharts, when training staff or evangelizing a proposal. My greatest strength is being able to communicate well with both technical and business-leaning colleagues. I am a skilled instructor who has the patience and people skills to pass on my knowledge to others. Because my leadership skills are rooted in the concept of leading by example, I can inspire those around me to great success.

WORK EXPERIENCE

October 2022-Current

Instructor

🏢 2U Trilogy
◎ Hanover Park, Illinois, United States

Teach online class called Full Stack Flex, which is a web development boot-camp style course leveraging Node.js, MongoDB ad React.js to build advanced web applications.

November 2021-October 2022

Web Developer

🏢 A Weber Site
◎ Hanover Park, Illinois, United States

• Designed and built websites using a variety of platforms/frameworks, including WordPress and Django.
• Consulted clients on web presence / brand management, including SEO and social media management.

December 2019-November 2021

Senior Web Developer

🏢 The Catholic Charities of Chicago
📍 Chicago, Illinois, United States

• Project management – received/reviewed/approved design deck from branding vendor, consulted with stakeholders, created specs for development, generated work breakdown structures and timelines, assigned tasks across comms/IT/HR staff for implementation, orchestrated site-wide content audit/review/reorganization.
• Web development – migrated/developed apps & business workflows from on prem to cloud platforms for finance/HR/IT/development, created/integrated platform modules as needed for all agency sites (in-house and vendor-hosted), setup/monitor analytics reporting.
• Special COVID projects – created apps and workflows for daily employee surveys, senior administrator site visits and ad-hock tasks for COVID consultant.

July 2014-November 2019

Senior Database Administrator

🏢 The Catholic Charities of Chicago
📍 Chicago, Illinois, United States

• Data management – ETL for data warehouse, clean/export/upload/verify data submissions for grant applications and to State and Federal social service agencies, migrate data, manage security groups and users.
• Software implementation – prepare import files per vendor specification, setup/configure electronic medical records system, digitize EMRS assessments, train users.
• Database operations – configure DB for mobile inventory app, backup data, perform database maintenance.
• Data reporting/SQL – create and modify SSRS reports/datasets, merge records, clean/validate data, export sensitive data for legal requests.

January 2013-June 2014

Web/SharePoint Content Manager

🏢 The Catholic Charities of Chicago
📍 Chicago, Illinois, United States

• Web development – internet content development and full-stack management for all agency web properties, intranet content and app development, css/html support for communications/development operations.
• Special IT projects – project manager for legal and finance dept. projects, feasibility research, requirements gathering, software demonstrations.
• Support management – consolidated IT support desks, created IT knowledgebase, staff training, high priority ticket expediting.

April 2012-December 2013

Web/MIS Support Specialist

🏢 The Catholic Charities of Chicago
📍 Chicago, Illinois, United States

• Software support – user experience discovery, testing, generate/publish documentation, software/process user training, gather requirements, demo creation, project research.

• Business intelligence – agency form design and development using Adobe XFA forms, workflow analysis.
• Tier 1 and 2 user support operations –intake/triage/troubleshooting via phone and ticket software, review/file bugs, user experience surveying.

November 2008-November 2009

Content Developer

🏢 Galaxy Tool Supply
📍 Chicago, Illinois, United States

• Team management – staff scheduling, task assignment, created/maintained product listings on multiple sites.
• Technical writing – created/maintained/categorized products/technical specifications, wrote descriptions.
• Graphic design – built photo booth, took/edited product photos for e-commerce/catalog sales applications.

April 2004-June 2007

Manufacturing Engineer/IT Department

🏢 CSM Fastener Products Company
📍 Elk Grove Village, Illinois, United States

• Procurement – designed custom/purchased standard tooling (open/solid dies, heading/threading/knurling dies) for cold heading/threading machines, managed tooling vendor relationships, resolved vendor issues.
• Webmaster/helpdesk – designed/implemented/maintained company website, troubleshot all IT issues.
• Engineering – maintained internal/industry/consensus part standards, produced/maintained manufacturing/sales AutoCAD/hand-drawn blueprints, created/maintained PPAP flow charts and FMEA matrices.
• Software development – leveraged in-house parts coding system to create an automated quoting application, built inventory database for sales/warehouse operations, created utilities/calculators for sales/engineering.

EDUCATION

1996-2001

Bachelor of Science

🎓 Marquette University
📍 Milwaukee, Wisconsin, United States

⚫ Computer Engineering
